

# Garrett® GTX30R & GTX35R Turbochargers

The next step in the evolution of the turbocharger is here! Garrett® GTX-R Turbos feature all new compressor wheels with next generation aerodynamics and improved efficiency to deliver wicked performance; now available in midframe sizes!

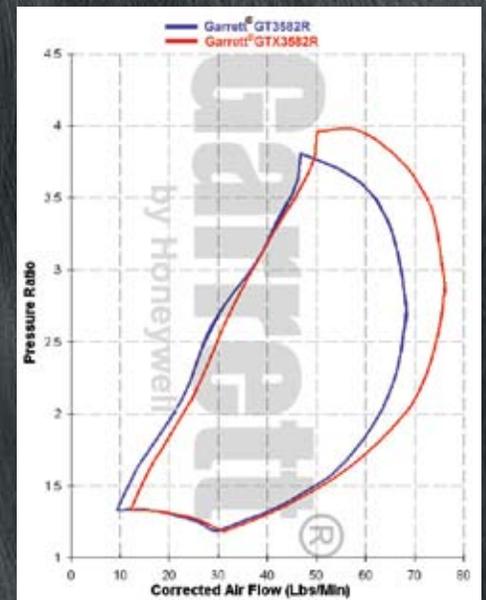

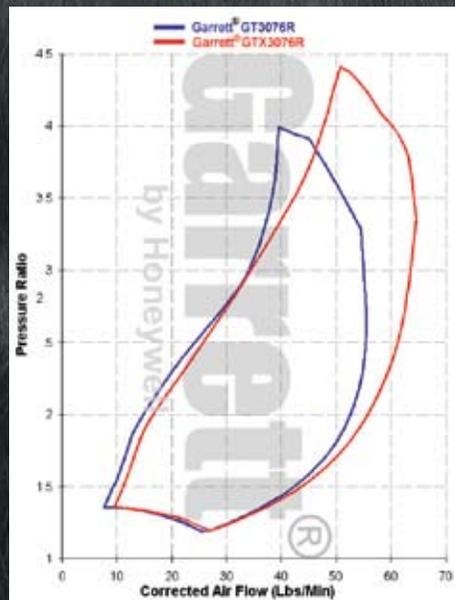

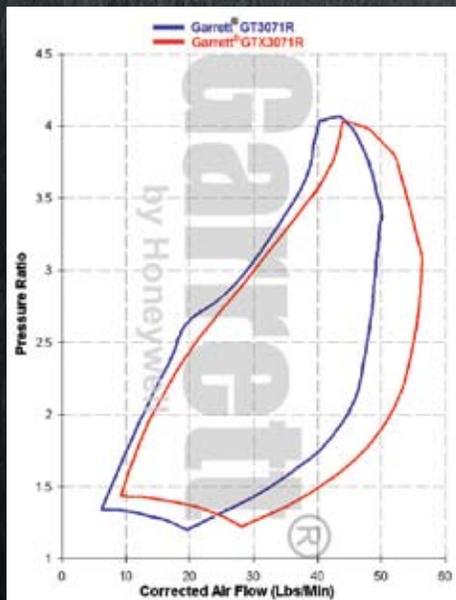

Garrett® GTX-R Turbochargers provide higher flow and pressure ratios beyond even the world-class Garrett® GT Series compressor wheels.

- Garrett® GTX-R turbos feature:
- 10%+ Gain in flow over traditional GT compressor wheel designs
  - 10%+ Higher pressure ratio compared to traditional GT compressor wheel designs
  - Forged, fully machined wheels
  - 11 Full-blade design for improved efficiency
  - Outline interchangeable with Garrett® GT Series turbos
  - Garrett® OE-quality for unbeatable reliability

Take the next step in turbocharging: Garrett® GTX-R

Garrett® GTX-R turbochargers are available through Garrett® Performance Distributors, Garrett® Master Distributors and Garrett® Performance Houses.
