

Garrett® Turbo Kit - Mustang GT

The retro-styled Ford Mustang GT has been turning heads and turning in timeslips all over the world since 2005. Now, for those seeking serious power gains, the Garrett® GT Tuner Turbocharger Kit is available for the world's favorite pony car!

The twin turbo setup features a pair of Garrett® GT2860RS "Disco Potato" turbochargers with patented dual ball bearing center housings and ultra high flow GT wheel design. All components of the kit are manufactured to the highest levels of quality to insure unmatched durability and reliability while delivering power on demand.

As Tested at 9 psi:
Horsepower: 483 bhp
Torque: 487 lb/ft
1/4 Mile ET: 11.59 sec.
1/4 Mile Speed: 118 mph

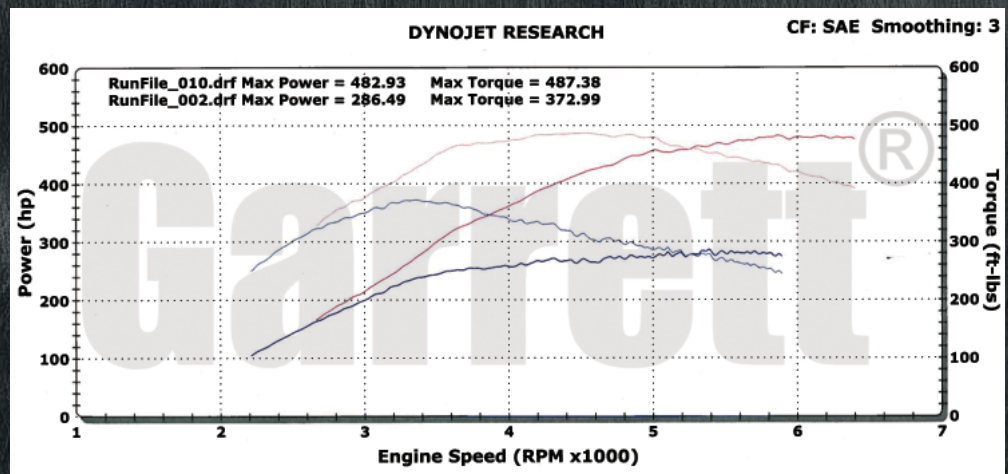

The Garrett® GT Tuner Turbocharger Kit for the Ford Mustang GT is fully customizable by the user, providing a solid platform to accommodate nearly any modifications.

The estimated horsepower to the wheels is over 450 pounding ponies ready to trample the competition! Even more horsepower is a boost adjustment away, just make sure that your engine is ready to handle the power!
